The Journal of Medicine and Medical Sciences is an international multidisciplinary peer-reviewed, Open Access Journal with reputable academics. It promotes excellence in current research works for advancing knowledge on Medicine and Medical Sciences. The Medicine and Medical Sciences has a collection of articles focused in 2019.

The order in which antibiotics are administered affects the fitness costs of Adherent-Invasive *E. coli* (AIEC) strains (Jordan Gregg, 2019) AIEC-LF82 is a pressure over microorganism as is surmised to bear a position between inflicting IBD or Crohn's disease via activating pro-inflammatory gene manifestation in organisms. Using antibiotics by using combination therapy has been a method used into medical settings of an strive according to deal with the strains, however, the tries have not been up to expectation positive nor efficient within phrases about completely halting the boom or colonization regarding AIEC in accordance with treat IBD yet Crohn's ailment patients. Research has proven that involving hindering yet preventing the colonization bacterial colonies, sequential remedy tends according to be more effective time-efficient than mixture therapy, together with fewer adverse outcomes.

Laparoscopic cholecystectomy in hepatitis C liver cirrhosis patients (Magdy MA, 2019) including this enlarge in the occurrence between viral C hepatitis, surgeons currently greater oft come across cirrhotic sufferers including evidential gallstones. Now, now certain sufferers required cholecystectomy, such is observed laparoscopically. However, an stomach pain, especially shining according to the appropriate shoulder, nausea and vomiting between the postoperative length due according to pneumoperitoneum using charcoal dioxide gas. The use over c finalization barrel below basic LC within sufferers without lungs cirrhosis, which is guessed in accordance with forestall such postoperative events, is an issue about sizeable debate. Aim about the work is in imitation of evaluate our ride of LC in hepatitis c bosom cirrhosis sufferers from surgical, anesthesia or surgical intensive seriousness aspects. We

carried out a prospective, randomized, double inadvisable study according to decide the impact concerning setting of drains afterwards LC in hepatitis c bosom cirrhosis patients regarding the chance concerning postoperative pain, nausea or vomiting.

Experience of dysmenorrhoea and self-care strategies among female students in a tertiary institution, Ibadan, Nigeria (Arulogun OS, 2019). A vivid cross-sectional land survey was used, and 354 agreeable girl college students chronic 16-29 years who had been residents in the halls participated within the study. A self-administered, semi-structured questionnaire used to be used because facts series.

Uterine artery pseudoaneurysm: A rare cause of postmyomectomy bleeding: Case report and literature review. Uterine vein pseudoaneurysm (UAP) is an obtained unnatural blood ark as space timbered beyond a leak about a uterine artery branch and procurement about thrombus. Most UAPs occur inward the uterus. They show up hardly ever or do improve afterwards a number of gynaecologic or obstetric procedures. Delay between its diagnosis do result of life threatening haemorrhage (Zahra F, 2019).

Factors related to mortality in patients with severe burns treated in the severe burn unit at Hubert Koutoukou MAGA national university hospital of Cotonou (Hounkpe PC, 2019). Burn accidents are a world scourge, accountable because greater than 265,000 deaths care of year, especially among low-income international locations that score because of 95% on every burned patients; among them, children are 70%. Burned sufferers among African international locations are a real populace health problem; however, she not know but amongst the health priorities about this countries. In Benin, those symbolize an actual people fitness concern.
