### EXPLORING THE CURRENT ADVANCEMENTS IN ADVANCED GENETICS

**Conference Announcement: World Congress on  
Advanced Genetics| Tokyo, Japan | 29-30 September,  
2020**

[Journal of Health and Medical Research](#)

We are contended to various delegate experts, company representatives and other eminent personalities who supported the conference by facilitating active discussion forums. As per the requests from our previous participants we are glad to introduce the World Congress on Advanced Genetics.

After much anticipation from our previous participants, we are organizing the “**World Congress on Advanced Genetics**” on **29-30 September, 2020** to take place in **Tokyo, Japan**.

Dr. Elsayed Ahmed Elnashar is serving as an Organizing Committee Member. He holds several academic administrative positions: Dean, Vice Dean, Head of Department, and Member of international scientific committees and will be delivering valuable keynote speech for the conference [Genetics 2020](#).

The theme for Genetics 2020 is: Revolution in Advanced and Future Genetics.

We hereby put forth Genetics 2020 as an interdisciplinary program that meets the demand for education and development in the fields of molecular genetics, medical genetics, cellular genetics, clinical genetics, behavioural genetics etc.

In the last few years, genetics has permeated all features of biology so that it has occupied a great significance in biology as a whole. On the one hand, genetics is the branch of biology which deals with the study of genes, genetic variation and heredity in organisms, while on the other hand it has provided the tools for the study of the biological processes examined, like plant physiology, biotechnology, biochemistry, ecology, microbiology, etc.

Our aim for this series is to administer an academic feast for all the eminent person of this field to share their ideas and provide a critical review on the topic “**ADVANCED GENETICS**”. This conference includes hearings from

experts in genetic research, Personalized & Targeted Medicine and related topics in order to promote development and education in the field.

With many more additions to the previous sessions our conference highlight for [Genetics 2020](#) includes:

Molecular Genetics Events, Human Genetics, Molecular Biology Meetings, Human Genetics Congresses.

The [Genetics 2020](#) deliberations focus on analysis, prediction and prevention of disease as genetics occupies the most important role in the diagnosis of disease and its sub-specialties and is designed to provide a platform for discussion and networking as well as to share new ideas, advancements and research related to the field.

This Academic event includes imperative Keynote forums, plenary presentations, poster presentations, workshops, exhibitions and more. By participating in forums, sharing research and collaborating, the research community will be much benefited.

Organized with the motive of accentuating the research with the help of international geneticists, surgeons, engineers and researchers by bringing together all the related experts and professionals under a single summit to emphasize the developments in health care and the future holds of Surgery.

We welcome you all to connect, contribute and collaborate with geneticists and researchers/surgeons from around the globe in Genetics 2020, 29-30 September, 2020.
